Executable FeatureScript Code

```
FeatureScript 1511;
import(path : "onshape/std/geometry.fs", version : "1511.0");
import(path : "onshape/std/common.fs", version : "1511.0");
....
```

Compilation

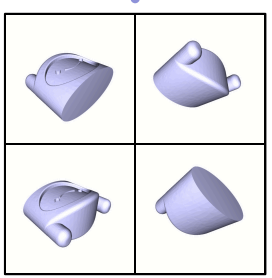

Onshape

Compiled Geometry

Qwen2-VL

Vision Encoder + Tokenizer or Tokenizer

Generate a CAD model using FeatureScript framework. Mesh bounds from (-48.64, -27.23, 0) to (48.64, 27.23, 74.93), center = (0, 0, 37.47), scale = 48.64

Dimensions

Step 1 - Sketch
Create a new sketch on Top plane.

...

Step 15 - Fillet
Apply a fillet of radius 5.08
